But in order to protect our wild places and the industries that rely on them, the Maine Legislature must fully fund the Land for Maine's Future Fund. Now is the time to turn goals into action.

Shortlisted for the CMI's Management Book of the Year Award 2018 and the Business Book Awards 2018 Twenty-five years after the arrival of the Internet, we are drowning in data and deadlines. Humans and machines are in fully connected overdrive - and starting to become entwined as never before. Truly, it is an Age of Overload. We can never have imagined that absorbing so much information while trying to maintain a healthy balance in our personal and professional lives could feel so complex, dissatisfying and unproductive. Something is missing. That something, Julia Hobsbawm argues in this ground-breaking book, is Social Health, a new blueprint for modern connectedness. She begins with the premise that much of what we think about healthy ways to live have not been updated any more than have most post-war modern institutions, which are themselves also struggling in the twenty-first century. In 1946, the World Health Organization defined 'health' as 'a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity.' What we understood by 'social' in the middle of the last century now desperately needs an update. In Fully Connected Julia Hobsbawm takes us on a journey - often a personal one, 'from Telex to Twitter' - to illustrate how the answer to the Age of Overload can come from devising management-based systems which are both highly practical and yet intuitive, and which draw inspiration from the huge advances the world has made in tackling other kinds of health, specifically nutrition, exercise, and mental well-being. Drawing on the latest thinking in health and behavioural economics, social psychology, neuroscience, management and social network analysis, this book provides a cornucopia of case studies and ideas, to educate and inspire a new generation of managers, policymakers and anyone wanting to navigate through the rough seas of overload.

The first book to define what social health means in the modern workplace, and the implications for individuals and society of being 'always on' in a hyper-connected world.

Celebrated scientists Nicholas Christakis and James Fowler explain the amazing power of social networks and our profound influence on one another's lives. Your colleague's husband's sister can make you fat, even if you don't know her. A happy neighbor has more impact on your happiness than a happy spouse. These startling revelations of how much we truly influence one another are revealed in the studies of Dr. Christakis and Fowler, which have repeatedly made front-page news nationwide. In Connected, the authors explain why emotions are contagious, how health behaviors spread, why the rich get richer, even how we find and choose our partners. Intriguing and entertaining, Connected overturns the notion of the individual and provides a revolutionary paradigm-that social networks influence our ideas, emotions, health, relationships, behavior, politics, and much more. It will change the way we think about every aspect of our lives.

Scientific experiments and medical improvements in recent years have augmented our bodies, made them manipulable; our personal data have been downloaded, stored, sold, analyzed; and the pandemic has given new meaning to the idea of 'virtual presence'. Such phenomena are often thought to belong to the era of the 'posthuman', an era that both promises and threatens to redefine the notion of the human: what does it mean to be human? Can technological advances impact the way we define ourselves as a species? What will the future of humankind look like? These questions have gained urgency in recent years, and continue to preoccupy cultural and legal practitioners alike. How can the law respond and adapt to a world shaped by technology and AI? How can it ensure that technological developments remain inclusive, while simultaneously enforcing ethical limits to its reach? The volume explores how fictional texts, whether on the page or on screen, negotiate the legal dilemmas posed by the increasing infiltration of technology into modern life.

What has changed in the workplace? Everything. The traditional office was probably doomed anyway. Then a global shutdown changed everything we thought we knew about work, including where and when it needed to take place. Automation and the Fourth Industrial Revolution have accelerated, and perhaps as much as one third of the world's permanent workforce will soon become remote. In The Nowhere Office, Julia Hobsbawm offers a strategic and practical guide to navigating this pivotal moment in the history of work and provides lessons for how both employees and employers can adapt. Hobsbawm draws on her extensive networks in business, academia, and entrepreneurship across generations to offer new ideas about how to handle hybrid working, as well as provides deep insight into how the way we work is being transformed by larger issues such as community, hierarchy, bias, identity, and security. The Nowhere Office describes a unique moment in the history of work which, if understood and handled correctly, can provide a springboard for the biggest transformational change in the workplace for a century: something better, more meaningful, and more workable for everyone.

The rapid advancement of technology has fuelled fast-paced change in business, creating a high-performance culture that requires leaders to be resilient, agile and results-focused. But the increased level of uncertainty and an ever-expanding workload often create stress, overwhelm, fear and polarization, leading to disconnection. The world never stops, and when people get caught in the same trap they risk burning out. In Leading Through Uncertainty, leadership expert Jude Jennison explores the challenges leaders face as human beings in a technological world, the new habits and behaviours they need to adopt to re-connect on a human to human basis, and the leadership qualities they need to lead through uncertainty. This is a call to return to the core of humanity to find the natural human characteristics of communication, connection, compassion and community, drawing on the experience of working with a herd of horses to understand the impact of non-verbal communication on leadership.

Modern life is complicated, much more so than it used to be. Acclaimed author and social entrepreneur, Julia Hobsbawm, shows you a simpler way. The Simplicity Principle challenges the assumption that all things that are complex have to stay that way. It helps keep things as lean, simple and focused as possible. Smartphone users experience concentration interruptions every 12 minutes of the day, there are over 250 billion emails sent every 24 hours and by 2021 the internet will have created more than 3.3 zettabytes of data. Yet complexity doesn't have to dominate, complicate or clutter our lives. Based on a hexagonal model, this book shows you that it's easy to streamline and simplify both your professional and personal lives with lessons based on the natural world. For anyone who feels that life can be too much, The Simplicity Principle will help you break free of the endless choices and complexities that we face in the world today. It's time to gain control of your focus and productivity, and most importantly, KEEP IT SIMPLE.

Discover how to help young people "make it" in a rapidly changing world Author Stephanie Malia Krauss gets it. Every day she works with leaders across the country as they upgrade learning experiences to better equip young people for a changing world. A mother, former teacher and school leader, Stephanie knows firsthand how hard it is to balance school and program requirements with young people's needs. In Making It: What Today's Kids Need for Tomorrow's World, she lays out what adults can do to get young people ready for the future. What you learn may surprise you. With so much changing so fast-accelerated by the impacts of COVID-19-the most in-demand jobs and skills of today may be obsolete by the time our youngest become adults. For kids to be ready for this new reality, they must acquire four critical "currencies" that will serve them well, whatever their future holds: credentials, competencies, connections, and cash. This book focuses on how to prioritize these four key outcomes whenever and wherever learning happens. The author shares research and experience to help you understand and apply a human-centered and future-focused lens directly to your classroom, school, program, or at home. Learn about how the world and workforce is changing, and what that means for the education and preparation young people need Understand how these changes are impacting young people, reshaping their childhoods and transitions into adulthood Glean practical information and ideas you can use to help young people-at every age and stage-to gain readiness "currencies" in the form of credentials, competencies, connections, and cash Challenge your beliefs about what knowledge, experiences and resources are most important for kids to have, and what a college- and career-ready education really requires Discover community-wide strategies that prioritize equity, learning and readiness for the future This book will benefit teachers, counselors, youth workers, parents, school board members, and state education leaders alike. Whether you work in K-12, youth development, or you just want to know how to best support the kids in your life, you will find a timely and useful resource putting young people first and modernizing their learning experiences for the better.

In a world of disruptive change, uncertainty is the buzzword on everyone's lips. Disruptive change can throw everything into chaos unless leaders and teams have the skills to lead confidently through it. How do you lead complex change without burning out, disconnecting or losing your team? Welcome to the age of Leading Through Uncertainty, where emotional responses to challenging situations are part of the human experience. Drawing on

numerous interviews with leaders from all walks of life demonstrating leadership in action, this new edition of the classic book on leadership and uncertainty has been revised and updated for the post-pandemic age. It explores these fundamental questions: How do you lead confidently and competently in uncertainty? How do you create human connection in a performance-driven culture? How do you adapt rapidly to technological advances and disruptive change without losing yourself or your team in the process? JUDE JENNISON is a leadership and team coach, recognized thought leader, international speaker and bestselling author, who specializes in developing leaders and teams through disruptive change. She combines 17 years' senior leadership experience in IBM with executive leadership, coaching and team development skills, as well as the pioneering approach of working with a herd of horses to help leaders become more confident in leading through the uncertainty of our time.

"One of the most interesting and useful books ever written on networking."—Adam Grant Social Chemistry will utterly transform the way you think about "networking." Understanding the contours of your social network can dramatically enhance personal relationships, work life, and even your global impact. Are you an Expansionist, a Broker, or a Convener? The answer matters more than you think. . . . Yale professor Marissa King shows how anyone can build more meaningful and productive relationships based on insights from neuroscience, psychology, and network analytics. Conventional wisdom says it's the size of your network that matters, but social science research has proven there is more to it. King explains that the quality and structure of our relationships has the greatest impact on our personal and professional lives. As she illustrates, there are three basic types of networks, so readers can see the role they are already playing: Expansionist, Broker, or Convener. This network decoder enables readers to own their network style and modify it for better alignment with their life plans and values. High-quality connections in your social network strongly predict cognitive functioning, emotional resilience, and satisfaction at work. A well-structured network is likely to boost the quality of your ideas, as well as your pay. Beyond the office, social connections are the lifeblood of our health and happiness. The compiled results from dozens of previous studies found that our social relationships have an effect on our likelihood of dying prematurely—equivalent to obesity or smoking. Rich stories of Expansionists like Vernon Jordan, Brokers like Yo-Yo Ma, and Conveners like Anna Wintour, as well as personal experiences from King's own world of connections, inform this warm, engaging, revelatory investigation into some of the most consequential decisions we can make about the trajectory of our lives.
