Volume of a Prism Practice Questions – Corbettmaths

Now, the question also gave us the volume: 54 cm^3 , so we can equate this value to the expression we found above and voila, we have an equation: $6(x+5)=54$. Now, we solve this equation to find x. First, divide both sides by 6 to get: $x+5=54\div 6=9$. Then, subtracting 5 from both sides we get the answer to be: $x=9-5=4\text{ cm}$

A textbook covering all the requirements for GCSE Intermediate Maths in three graded stages. It also serves as a revision programme consisting of a summary and mixed exam questions at the end of each stage. Included are reminders of key topics and work done at Key Stage 3 with fact sheets phased throughout Stage 1. A range of icons guide the user throughout the material, indicating the topics covered, key objectives, definitions, formulas, dos and don'ts and sample questions.

Build essential maths, literacy and working scientifically skills to boost marks in GCSE Biology and ensure that students reach their full potential. Suitable for all specifications, this skills book provides

Online Library Gcse Exam Questions On Volume The Bemrose School

additional support and will help to: - Sharpen mathematical skills with plenty of practice questions and coverage of all the maths techniques needed for the exams. - Improve literacy skills with tips on how to write longer answers, plus peer-assessment marking activities. - Develop the working scientifically skills needed to plan, carry out and evaluate practical experiments, in order to secure the maximum number of marks. - Build confidence by putting skills into practice; using our three-step formula students will progress from worked examples to guided questions and exam-style questions, with fully-worked solutions in the book. - Raise performance in the exams with practical advice on how to revise effectively and tips on understanding the questions, command words and assessment objectives.

Mathematics is one of the most important life skills a person can have. Hence, it is essential that it is taught in a way which enables the student to gain an excellent foundation in maths and the skills needed to use maths in a wide variety of applications. This book aims to be an important aid in achieving this by providing over 500 problems with worked solutions at GCSE level, for the student to study. Solutions are given in detail, this is to enable the student to check their progress and understanding of the topic and to iron out any difficulties they may encounter. The book is organised in two volumes. The layout of the chapters is such that after a brief summary of the topic, the book goes onto provide a number of questions in each subject along with the worked solution. The questions chosen are intended to build the knowledge and skills needed for GCSE level maths. Finally the last chapter of the volume consists of typical questions and solutions that may arise in a GCSE maths exam.

Written by examiners and practising teachers, this work offers study and homework support throughout GCSE. It is useful as a reference source, a lesson back-up and as a revision guide.
