Cranes & Power Lines Don ' t Mix.

It must be assumed that all power lines are energized unless the utility owner/operator confirms that the power line has been and continues to be de-energized and it is visibly grounded at the worksite.

To avoid contact to power lines when operating cranes the employer must follow the regulations of 1926 Subpart CC. Follow these three steps every time a crane is operated.

~~Cranes & Power Lines Don ' t Mix~~  
NEVER, when using cranes and/or equipment near energized power lines of 50,000 volts (50kV) or more, get closer than 10 feet plus 4 inches for each 10kV over 50kV.

~~SAFETY Council~~  
NEVER use cranes alone where it is difficult by visible means to maintain the desirable clearance. NEVER forget that overhead power lines could be energized.

## ~~Crane and Derrick Safety I— Power Line Safety ...~~

Electricity – overhead power lines  
What you need to do. The law says that any work near electric overhead power lines must be carefully planned and carried out to avoid danger from accidental contact or close proximity to the lines.. The precautions necessary will depend on the nature of the work at the site and will be required even when work near the line is of short duration.

This is nuts. Its amazing how close the people in the background get.

~~Crane hits power line - YouTube~~  
WARNING: Contact with an overhead power line may cause the power to 'trip out' temporarily and it may be re-energised automatically, without warning. Your local Distribution Network Operator (DNO) can generally supply stickers describing emergency procedures and containing contact numbers that can be stuck in the cabs of vehicles likely to be used near overhead power lines.

being moved by a telescoping boom crane. As the crane ' s boom was swung in the direction of 7,200 volt power lines, the cable contacted the lines and the worker was electrocuted. Case 2:A co-owner of a steel erection company and three workers were using.

### ~~CRANE SAFETY~~ - J.E. Spear Consulting

Operate cranes at a slower-than-normal rate in power line areas. Use caution when moving over uneven ground that could cause the crane to weave or bob into power lines. Use caution near long spans of overhead power lines, since wind can cause the power lines to sway back and forth and reduce the clearance between the crane and the power line.

Decades before the emergence of a French self-styled 'hood' film around 1995, French filmmakers looked beyond the gates of the capital for inspiration and content. In the Paris suburbs they found an inexhaustible reservoir of forms, landscapes and social types in which to anchor their fictions, from bourgeois villas and bucolic

riverside cafés to post-war housing estates and postmodern new towns. For the first time in English, contributors to this volume address key aspects of this long film history, marked by such towering figures as Jean Renoir, Jacques Tati and Jean-Luc Godard. Idyllic or menacing, expansive or claustrophobic, the suburb served divergent aesthetic and ideological programmes across the better part of a century. Themes central to French cultural modernity – class conflict, leisure, boredom and anti-authoritarianism – cut across the fifteen chapters.
