Each of these essays considers the convoluted nature of the transmission process in question, and reconsiders the historical framework that has informed our own reception of it."--BOOK JACKET.

International trade and investment have flourished globally but nowhere so spectacularly as in the Asia-Pacific region. This volume brings together some of the most eminent economists in the field to analyse this vital region from both theoretical and empirical perspectives. The volume focuses especially on trade policy and welfare, game theory analysis of trade policy and the linkages between trade policy and endogenous growth.

"An utterly satisfying examination of the business of popular music." —Nathaniel Rich, *The Atlantic* There ' s a reason today ' s ubiquitous pop hits are so hard to ignore—they ' re designed that way. *The Song Machine* goes behind the scenes to offer an insider ' s look at the global hit factories manufacturing the songs that have everyone hooked. Full of vivid, unexpected characters—alongside industry heavy-hitters like Katy Perry, Rihanna, Max Martin, and Ester Dean—this fascinating journey into the strange world of pop music reveals how a new approach to crafting smash hits is transforming marketing, technology, and even listeners ' brains. You ' ll never think about music the same way again. *A Wall Street Journal Best Business Book*

Over the last twenty years, there has been an increasing number of factors that have placed the manufacturing strategies of companies and countries in a global context. This book reviews and addresses the global manufacturing strategy area through research in the four major economic areas of the world: Europe, North America, Latin America and Asia. *International Manufacturing Strategies: Context, Content and Change* is the result of a single major research project undertaken in twenty countries, focusing on the manufacturing strategies and practices in each, and uses research data to focus on factors specific to industrial countries or regions and those which are common across the group of countries or the entire sample. The core of this book is a set of chapters reviewing individual countries. Each country is reviewed in a format with an overall common approach: the socio-economic background; the distinctive results for that country from the research and the link between the two. Most will be illustrated by a small case study of a company. Following this is an integrating review of the findings from various countries, the different trajectories followed, and the impact on external variables and the socioeconomic context on those. The final part of the book is devoted to new ideas and developments in functional areas and in manufacturing strategy that have been developed from the analysis conducted during the research.
